

§ 4206.6

29 CFR Ch. XL (7-1-03 Edition)

first plan year ending on or after such date; and

(2) The aggregate post-1980 change amount determined under section 4211(c)(2)(C) of ERISA as if the employer had completely withdrawn in the year of the prior partial withdrawal, reduced as if those obligations were being fully amortized in level annual installments over the 5-year period beginning with the plan year in which the prior partial withdrawal occurred.

(c) *Employer's allocable share of old liabilities.* The sum of the amounts determined under paragraph (b) are multiplied by the two fractions described in this paragraph in order to determine the amount of old liabilities that was previously assessed against the employer.

(1) The first fraction is the fraction determined under section 4206(a)(2) of ERISA for the prior partial withdrawal.

(2) The second fraction is a fraction, the numerator of which is the amount of the liability assessed against the employer for the prior partial withdrawal, and the denominator of which is the product of—

(i) The amount of unfunded vested benefits allocable to the employer as if it had completely withdrawn as of the date of the prior partial withdrawal (determined without regard to any adjustments), multiplied by—

(ii) The fraction determined under section 4206(a)(2) of ERISA for the prior partial withdrawal.

§ 4206.6 Amount of credit in plans using the rolling-5 method.

In a plan that uses the rolling-5 allocation method described in section 4211(c)(3) of ERISA, the credit shall equal the amount of the liability assessed for the prior partial withdrawal, reduced as if that amount was being fully amortized in level annual installments over the 5-year period beginning with the plan year in which the prior partial withdrawal occurred. When an employer's prior partial withdrawal liability has been reduced or waived, this credit shall be adjusted in accordance with § 4206.8.

§ 4206.7 Amount of credit in plans using the direct attribution method.

In a plan that uses the direct attribution allocation method described in section 4211(c)(4) of ERISA, the credit shall equal the amount of the liability assessed for the prior partial withdrawal, reduced as if that amount was being fully amortized in level annual installments beginning with the plan year in which the prior partial withdrawal occurred, over the greater of 10 years or the amortization period for the resulting base when the combined charge base and the combined credit base are offset under section 412(b)(4) of the Code. When an employer's prior partial withdrawal liability has been reduced or waived, this credit shall be adjusted in accordance with § 4206.8.

§ 4206.8 Reduction of credit for abatement or other reduction of prior partial withdrawal liability.

(a) *General.* If an employer's withdrawal liability for a prior partial withdrawal has been reduced or waived, the credit determined pursuant to §§ 4206.4 through 4206.7 shall be adjusted in accordance with this section.

(b) *Computation.* The adjusted credit is calculated by multiplying the credit determined under the preceding sections of this part by a fraction—

(1) The numerator of which is the excess of the total partial withdrawal liability of the employer for all partial withdrawals in prior years (excluding those partial withdrawals for which the credit is zero) over the present value of each abatement or other reduction of that prior withdrawal liability calculated as of the date on which that prior partial withdrawal liability was determined; and

(2) The denominator of which is the total partial withdrawal liability of the employer for all partial withdrawals in prior years (excluding those partial withdrawals for which the credit is zero).

§ 4206.9 Amount of credit in plans using alternative allocation methods.

A plan that has adopted an alternative method of allocating unfunded vested benefits pursuant to section 4211(c)(5) of ERISA and part 4211 of this
